Pacific Coast Archaeological Society Quarterly

The *Pacific Coast Archaeological Society Quarterly* is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group formed to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas.

The Publications Committee invites the submittal of original contributions dealing with the history and prehistory of the area. Although PCAS is especially interested in reports which shed further light on the early inhabitants of Orange County, it is always interested in reports on the wider Pacific Coast region.

Subscription to the *Pacific Coast Archaeological Society Quarterly* costs \$35 for calendar year 2002. The PCAS also publishes a monthly newsletter, which costs \$15 for calendar year 2002. There is an additional postage charge for foreign subscriptions: \$9 for the *Pacific Coast Archaeological Society Quarterly* and \$4 for the *PCAS Newsletter*. Back issues of the *Pacific Coast Archaeological Society Quarterly* are available for \$12 per single issue (including postage and handling for domestic address). A complete list of the articles in previous issues is included in the 25-year index published as Volume 25, Number 4, (1989) and the 5-year supplement published as Volume 32 Supplement (1996). Two *Occasional Papers*, on Catalina Island and on Mexican Majolica, also have been published by PCAS. To place an order, or to receive information about the Pacific Coast Archaeological Society, or to submit an article for publication, write to: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627, email: info@pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address. Articles appearing in the *Pacific Coast Archaeological Society Quarterly* are abstracted in *Historical Abstracts* and *America: History and Life*.

Recent issues of the *Pacific Coast Archaeological Society Quarterly* appear on the Internet at www.pcas.org where they can be downloaded and viewed, but not printed. This issue of the *Pacific Coast Archaeological Society Quarterly* is copyrighted © 2002 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

About the Authors

Lawrence M. Bost obtained his B.A. degree in biochemistry from the University of California at Berkeley and his M.D. degree from the New York Medical College. He completed his residency in Diagnostic Radiology at New York Medical College and a fellowship in Cardiovascular and Interventional Radiology at Harvard Medical School. He is currently Professor of Clinical Radiology at Albert Einstein College of Medicine at Yeshiva University, and Chief of the Division of Cardiovascular Imaging at the Beth Israel Medical Center in New York. His research interests include use of computer reconstruction for diagnostic medical imaging, and non-invasive diagnosis of congenital heart disease in adult patients.

Matthew A. Bost earned his Ph.D. in Anthropology from the University of California, Los Angeles. He has worked for several years as a cultural resources consultant for the California State University, Long Beach Department of Physical Planning and Facilities Management. His research interests include the origins and development of Olmec civilization, the prehistory of Baja California Sur, and coastal archaeology in southern California. Currently at California State University, Northridge, he is a part-time lecturer in anthropology and is involved in the development of internet-based university curricula.

Colleen Delaney-Rivera completed her B.A. at Beloit College, and M.A. and Ph.D. at the University of California, Los Angeles, Department of Anthropology. She has conducted field work in California since 1991. She is a strong advocate for the use of archaeological repository collections and is currently an Assistant Professor of Anthropology at California State University, Fullerton.

Robert L. Hoover received his B.A., M.A., and Ph.D. degrees in Anthropology from the University of California, Berkeley with a specialty in the archaeology of California. He has taught at Stanford University and was a professor at California Polytechnic State University, San Luis Obispo, for 28 years. Since 1976, he has specialized in Spanish colonial archaeology, serving continuously as Director of the Archaeological Field School at Mission San Antonio de Padua for 27 years. Dr. Hoover served three administrations as a member of the State Historical Resources Commission for 17 years. He is past president of the California Mission Studies Association and currently serves on the boards of the Santa Barbara Mission Archive/Library, the Santa Barbara Trust for Historic Preservation, and the California Missions Foundation. Dr. Hoover has contributed several articles and has served as guest editor for the *PCAS Quarterly*.

Paul E. Langenwalter II received his B.A. degree in Anthropology from California State University, Long Beach, and M.A. degree in Anthropology from the University of California, Riverside. He focuses his research on human animal use patterns in modern and archaeological contexts in western North America. Mr. Langenwalter is a professor in the School of Intercultural Studies at Biola University, and Lead Instructor in the

Department of Anthropology at Cypress College where he supervises the field archaeology program. He has published in several archaeology journals including *PCAS Quarterly*.

Theodore T. Miller received his B.A. in Latin from the University of Pennsylvania and his M.D. degree from Vanderbilt University School of Medicine. He did an internship in the Department of Pathology at the New York Hospital. His radiology training consisted of a residency in diagnostic radiology at Mt. Sinai Hospital in New York and a fellowship in musculoskeletal imaging at the Hospital for Special Surgery in New York. Dr. Miller is the Chief of the Division of Musculoskeletal Imaging for the Department of Radiology at North Shore University Hospital and Long Island Jewish Hospital, and is Associate Professor of Clinical Radiology at New York University, School of Medicine. His research interests include imaging of infection and sonography of sports injuries.

Mark Q. Sutton received his B.A. and M.A. degrees from California State University, Sacramento and received his Ph.D. in Anthropology from the University of California, Riverside. He is currently Professor of Anthropology at California State University, Bakersfield. Most of his research concerns the prehistory of western North America, paleoecology, insect usage, linguistic prehistory, and archaeometry. He has published many articles in a number of archaeological and anthropology journals including *PCAS Quarterly*.
