Pacific Coast Archaeological Society Quarterly

The Pacific Coast Archaeological Society Quarterly is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group originally founded to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas. The Publications Committee invites the submittal of original contributions dealing with regional history and prehistory. Although PCAS is especially interested in reports which shed further light on the early inhabitants of coastal southern California, it is always interested in reports on the wider Pacific Coast region.

Information about subscriptions to the Pacific Coast Archaeological Society Quarterly and the PCAS Newsletter is available online at www.pcas.org. Back issues of the Pacific Coast Archaeological Society Quarterly are available. An index to Volumes 1 through 40 is available as Volume 40, Numbers 3 & 4. This searchable index is online at www.pcas.org. Three Occasional Papers, on Catalina Island, Mexican Majolica, and the Peralta Adobe, have also been published by PCAS. To place an order, receive information about the Pacific Coast Archaeological Society, or submit an article for publication, email publications@pcas.org or write: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627. Additional information is available at www.pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address.

Recent issues of the Pacific Coast Archaeological Society Quarterly are available at www.pcas.org and can be downloaded and viewed, but not printed. Articles appearing in the Pacific Coast Archaeological Society Quarterly are abstracted in Historical Abstracts and America: History and Life. This issue of the Pacific Coast Archaeological Society Quarterly is copyrighted © 2010 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

PCAS Officers 2006

President Megan Galway
Vice President Sandy Schneeberger
Secretary Dorothy DeGennaro
Treasurer Robert Brace

Contents

Reconceptualizing the Encinitas Tradition of Southern California .................................................. 1
Mark Q. Sutton and Jill K. Gardner

Glans Penis Effigies from the Cogged Stone Site, Orange County.................................................. 65
Henry C. Koerper and Nancy Anastasia Desautels-Wiley

Cover: Glans penis effigies from the Cogged Stone site. Drawings by Joe Cramer.
About the Authors

Nancy Anastasia Desautels-Wiley, Ph.D., began her career studying classical languages; Dr. Desautels-Wiley subsequently broadened her scholarly pursuits to include research focused on both prehistoric and historic archaeology; she was certified in both subdisciplines by the Society of Professional Archaeologists. Experience in New York State prehistory and a strong classical background in history and architecture have served her well as research director and principal investigator for the oldest cultural resource management firm, Scientific Resource Surveys, Inc. (SRS) (est. 1973). Dr. Desautels-Wiley has managed the longest privately funded cultural resource investigations in southern California (29 years). These investigations comprise a multi-site and multi-disciplinary project that integrates archaeological, historic, ethnographic and paleontological studies. Within the last three years, she has expanded her expertise in Native American cultural studies and has recently accepted a position as tribal archaeologist for the Chilkat Tlingit Tribal group in Haines, Alaska. She is married to a Tlingit/Southern Tutchone Native, Ted Wiley, and they have opened a branch office of SRS in Haines in order to train Native American monitors. The company is researching the Tlingit language using the Alaskan field notes of J. P. Harrington; the goal is to generate a comparative Tlingit dictionary.

Jill K. Gardner, Ph.D., received her B.A. and M.A. in anthropology at California State University, Bakersfield, and her Ph.D. in anthropology from the University of Nevada, Las Vegas. Dr. Gardner’s main research areas are the Mojave Desert, the Great Basin, the southern Sierra Nevada, the southern San Joaquin Valley, and the southern California coast. She has also conducted excavations and analysis of Late Roman/Coptic mummies at Tell El-Hibeh in Egypt and participated in excavations at a Neolithic site in southern Jordan. Dr. Gardner has published articles in the Journal of California and Great Basin Anthropology, Quaternary Science Reviews, British Archaeological Reports, Pacific Coast Archaeological Society Quarterly, Coyote Press Archives of Great Basin Prehistory, Proceedings of the Society for California Archaeology, and Nevada State Museum Anthropological Papers, and she has coauthored books through the University of Arizona Press and AltaMira Press.

Henry Koerper, Ph.D., is retired from Cypress Community College but has managed to keep active as a consultant to Statistical Research, Inc., Redlands Office, and as a consultant to Scientific Resource Surveys, Inc., Orange County Corporate Office. His interests outside of California prehistory include American Indians in modern sports, the ancient and modern Olympic Games, the California Gold Rush, the 1906 San Francisco earthquake and fire, ancient Greek numismatic art, and the history of science.
Mark Q. Sutton, Ph.D., began his career in anthropology in 1968. While still in high school, he took advantage of the opportunity to participate in archaeological excavations conducted by the local community college. He went on to earn a B.A. (1972), an M.A. (1977), and a Ph.D. (1987) in anthropology. He has worked as an archaeologist for the U.S. Air Force, the Bureau of Land Management, and various private consulting firms, and he has taught at a number of community colleges and universities. He taught at California State University, Bakersfield, from 1987 to 2007, where he retired as Professor Emeritus of Anthropology. He now works for Statistical Research, Inc. in San Diego. Dr. Sutton’s research has included studies on understanding hunter-gatherer adaptations to arid environments, entomophagy, prehistoric diet and technology, and optimal foraging theory. Dr. Sutton has worked at more than 120 sites in western North America and has published over 150 books, monographs, and papers on archaeology and anthropology.
