Pacific Coast Archaeological Society Quarterly

The *Pacific Coast Archaeological Society Quarterly* is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group formed to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas.

PCAS thanks the archaeologists and other experts who voluntarily provide peer review of all of the articles appearing in the *Pacific Coast Archaeological Society Quarterly*.

The Publications Committee invites the submittal of original contributions dealing with the history and prehistory of the area. Although PCAS is especially interested in reports which shed further light on the early inhabitants of Orange County, it is always interested in reports on the wider Pacific Coast region.

Subscription to the *Pacific Coast Archaeological Society Quarterly* costs \$35 for calendar year 2003. The PCAS also publishes a monthly newsletter, which costs \$15 for calendar year 2003. There is an additional postage charge for foreign subscriptions: \$9 for the *Pacific Coast Archaeological Society Quarterly* and \$4 for the *PCAS Newsletter*. Back issues of the *Pacific Coast Archaeological Society Quarterly* are available for \$12 per single issue (including postage and handling for domestic address). A complete list of the articles in previous issues is included in the 25-year index published as Volume 25, Number 4, (1989) and the 5-year supplement published as Volume 32 Supplement (1996). Two *Occasional Papers*, on Catalina Island and on Mexican Majolica, also have been published by PCAS. To place an order, or to receive information about the Pacific Coast Archaeological Society, or to submit an article for publication, write to: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627, email: info@pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address. Articles appearing in the *Pacific Coast Archaeological Society Quarterly* are abstracted in *Historical Abstracts* and *America: History and Life*.

Recent issues of the *Pacific Coast Archaeological Society Quarterly* appear on the Internet at www.pcas.org where they can be downloaded and viewed, but not printed. This issue of the *Pacific Coast Archaeological Society Quarterly* is copyrighted © 2002 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

Contents

Introduction: New Directions in Channel Islands Archaeology	1
Torben C. Rick	
Dates, Demography, and Disease: Cultural Contacts and Possible Evidence for Old World Epidemics among the Island Chumash	11
Jon M. Erlandson, Torben C. Rick, Douglas J. Kennett, and Phillip L. Walker	
Obsidian Source Characterization and Human Exchange Systems on California's Channel Islands	27
Torben C. Rick, Craig E. Skinner, Jon M. Erlandson, and René L. Vellanoweth	
<i>Dentalium</i> Shell Artifacts from a 6600-Year-Old Occupation of Otter Cave	45
Jon M. Erlandson, René L. Vellanoweth, Annie C. Caruso, and Melissa R. Reid	
Archaeology of Santa Barbara Island: Past Projects and Future Directions	57
Torben C. Rick	

Please note that this issue was printed in July, 2003.

About the Authors

Annie C. Caruso is completing her B.A. in Anthropology and Judaic Studies at the University of Oregon. Her research interests include shell midden analysis, Pacific Islands archaeology, and Near Eastern archaeology. She has field experience in Palau, Micronesia, and is currently analyzing a large assemblage of invertebrate faunal remains obtained from a series of cave and open-air sites on the island.

Jon M. Erlandson received his Ph.D. in Anthropology from the University of California, Santa Barbara in 1988. A Professor of Anthropology and Knight Professor of Liberal Arts and Sciences at the University of Oregon, he has spent 25 years studying the archaeology of coastal California and the Pacific Coast of North America. Erlandson has published over 100 scholarly articles, books, or edited volumes on these and other topics.

Douglas J. Kennett received his Ph.D. in Anthropology from the University of California Santa Barbara in 1998. An Assistant Professor at the University of Oregon, Kennett has published extensively on behavioral ecology and the archaeology of California's Northern Channel Islands. His current research projects involve archaeological fieldwork on Rapa, French Polynesia, and the Pacific Coast of southern Mexico.

Melissa R. Reid received her B.S. in Anthropology from the University of Oregon. Her research interests include coastal archaeology, shell midden analysis, bioarchaeology, human osteology, and forensic anthropology. She has field experience on the Channel Islands, the California Coast, and Iceland. She is currently laboratory assistant in the Coastal Archaeology and Human Ecology Laboratory at the University of Oregon.

Torben C. Rick is a Ph.D. candidate in Anthropology at the University of Oregon. With research interests in coastal and maritime societies, social and economic complexity, and zooarchaeology, Rick has worked on numerous archaeological projects on the Channel Islands, southern California Coast, and Pacific Northwest. His dissertation research focuses on the Late Holocene archaeology of San Miguel and Santa Rosa islands.

Craig E. Skinner completed B.S. and Ed.M. degrees at Oregon State University and M.S. degrees in Interdisciplinary Studies and Anthropology at the University of Oregon. He is past-president of the International Association for Obsidian Studies, and his major research interests are in archaeometry, particularly trace element provenance studies of volcanic tephra, obsidian, and other lithic materials. As the owner of Northwest Research Obsidian Studies Laboratory, he currently spends his days X-raying artifacts from the western United States, Canada, and Mexico.

René L. Vellanoweth received his Ph.D. in Anthropology from the University of Oregon in 2001. Currently an Assistant Professor of Anthropology at Humboldt State University, Vellanoweth has over 15 years of experience

working on the archaeology of the California Coast and Channel Islands. He is interested in coastal and aquatic archaeology, human trade and exchange, and maritime adaptations.

Phillip L. Walker received his Ph.D. in Anthropology from the University of Chicago in 1973. A Professor of Anthropology at the University of California Santa Barbara, Walker is currently conducting research on human skeletons from the Santa Barbara Channel mainland, Channel Islands, and Europe to document incidences of infectious disease, interpersonal violence, and malnutrition. Walker is the author of numerous scholarly journal articles, books, and monographs focused on physical anthropology, osteology, and human evolution.
