Pacific Coast Archaeological Society Quarterly

The Pacific Coast Archaeological Society Quarterly is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group originally founded to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas. The Publications Committee invites the submittal of original contributions dealing with regional history and prehistory. Although PCAS is especially interested in reports which shed further light on the early inhabitants of coastal southern California, it always welcomes reports on the wider Pacific Coast region.

Information about subscriptions to the Pacific Coast Archaeological Society Quarterly and the PCAS Newsletter is available online at www.pcas.org. Back issues of the Pacific Coast Archaeological Society Quarterly are available. An index to Volumes 1 through 40 is available as Volume 40, Numbers 3 & 4. This searchable index is online at www.pcas.org. Four Occasional Papers (on Catalina Island, Mexican Majolica, and the Peralta Adobe and a remembrance of H. B. Nicholson) have also been published by PCAS. To place an order, receive information about the Pacific Coast Archaeological Society, or submit an article for publication, email publications@pcas.org or write: Pacific Coast Archaeological Society, PO Box 10926, Costa Mesa, California, 92627. Additional information is available at www.pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address.

Recent issues of the Pacific Coast Archaeological Society Quarterly are available at www.pcas.org and can be downloaded and viewed but not printed. Articles appearing in the Pacific Coast Archaeological Society Quarterly are abstracted in Historical Abstracts and America: History and Life. This issue of the Pacific Coast Archaeological Society Quarterly is copyrighted © 2017 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

This issue was published in July 2017. In the PCAS Quarterly publication sequence, this issue is Volume 53, Numbers 2 and 3 (subscription year 2017).
Contents

The Desert Serrano of the Mojave River ................................................................. 1
Mark Q. Sutton and David D. Earle

Pearl Ornaments from the Covacha Babisuri Site,
Espíritu Santo Island, Baja California Sur, Mexico .............................................. 63
Harumi Fujita, Carlos Cáceres-Martínez, and Amira F. Ainis

Portable XRF Analysis of Obsidian Projectile Points and Debitage
from Paipai Territory, Northern Baja California .................................................. 87
Brandon M. Gay, Christopher Brito, and Ian Weir

Donut Stones as Fishing Sinkers in Coastal Southern California? ....................... 103
Henry C. Koerper

About the Authors

Amira F. Aminis received her MA degree at California State University, Los Angeles, and is a Ph.D. candidate at the University of Oregon. She has conducted archaeological research and field work on the California Channel Islands for 11 years and is analyzing a ≈10,000 year sequence from Bay Point (northeast coast of San Miguel Island) for her dissertation. For the past few years she has also been collaborating with INAH archaeologists working at various archaeological sites on the Baja California peninsula.

Christopher Brito is a recent graduate from California State University, Dominguez Hills, who received a BA in Anthropology with a concentration in Archaeology. At the university he pursued research in obsidian sourcing and chemical analysis.

Carlos Cáceres-Martínez has been a professor at Universidad Autónoma de Baja California Sur at La Paz, Mexico, since 1985. His research focuses on the development of marine mollusk aquaculture in northwest Mexico and on malacology. He is an expert on Pacific coast pearl oyster and scallop reproduction. He promotes Sea of Cortes natural conservation. He is interested in the relationship of ancient Californians and sea shells on the Baja California coast. He is currently teaching General Biology, Marine Ecology, and Aquaculture Engineering.

David D. Earle earned his MA at UC Santa Barbara. He specializes in southern California Native ethnohistory/ethnography, including Harrington and mission register materials, agricultural history, and railroad history as a consultant for CRM firms. He has carried out ethnohistorical research in Mexico, Colombia, Peru, and Spain. He currently teaches anthropology at Antelope Valley College.

Harumi Fujita obtained her BA in Archaeology from Escuela Nacional de Antropología e Historia (ENAH), Mexico City. She has been a researcher at Instituto Nacional de Antropología e Historia (INAH) in La Paz, Baja California Sur, since 1991. She has recorded more than 500 diverse hunter-gatherer-fisher archaeological sites in the Cape Region of the Baja California peninsula. From 2001 to 2008 she directed an extensive excavation project at Covacha Babisuri, a trans-Holocene site, and has dug test pits in various sites on Espiritu Santo Island. Since 2012, she has conducted survey and excavation projects near La Paz. In addition, she conducted various salvage and rescue projects and directed public attention services in the Cape Region.

Brandon M. Gay recently graduated with a BA degree in Anthropology from California State University, Dominguez Hills, where he pursued research involving lithic tool chemical analysis and remote sensing. He is a first-year graduate student at the University of California, San Diego, where his current focus is southern Peru landscape archaeology and cultural interaction zones.
Henry Koerper received a BA (1965) and an MA (1968) from UC Davis. He earned his Ph.D. in anthropology at UC Riverside in 1981. His varied employments have included: CDF firefighter; USFS fire suppression field and laboratory researcher; California Army National Guard explosives technician; archaeological field excavator (e.g., Old Sacramento Project, Prescott College Black Mesa Project); Peace Corps teacher and athletic coach (Voi Harambee High School, Kenya); college anthropology professor (Chapman College [5 years] and Cypress Community College [30 years]); and archaeological consultant to several southern California CRM firms. Semi-retirement allows Dr. Koerper time to help produce the PCAS Quarterly.

Mark Q. Sutton, Ph.D., began his career in 1968, working at a site with the local community college while still in high school. He went on to earn a BA (1972), an MA (1977), and a Ph.D. (1987) in anthropology. He has worked for the US Air Force, the US Bureau of Land Management, and various private consulting firms, and he taught at a number of community colleges and universities. He taught at California State University, Bakersfield, from 1987 to 2007, where he retired as Emeritus Professor of Anthropology. He now teaches at the University of San Diego and works for Statistical Research, Inc.. From 1986 to 2000, Dr. Sutton served as the Editor of the Journal of California and Great Basin Anthropology. Dr. Sutton has investigated hunter-gatherer adaptations to arid environments, entomophagy, prehistoric diet and technology, the prehistory of California, and Paleoindian studies. Dr. Sutton has worked at more than 120 sites in western North America, has presented some 126 papers at professional meetings, and has published more than 200 books, monographs, articles, and reviews on archaeology and anthropology, including the following textbooks: Introduction to Native North America; A Prehistory of North America; Archaeology: Science of the Human Past; Introduction to Cultural Ecology; Paleonutrition; and Laboratory Methods in Archaeology.

Ian Weir recently graduated with a BA in Anthropology from California State University, Dominguez Hills, where he pursued research in obsidian sourcing.
