DECEMBER PCAS SPEAKER

Dr. Brian Fagan

*The Intimate Bond: How Animals Changed History*

We’ve lived in close association with all kinds of animals since the Ice Age. But how have animals and our relationships with them changed history? Brian Fagan tells a little known story of respect and partnership, of love and cruelty, of ways in which the ever-changing relationship between animals and humans has defined and

(Continued on p. 3)

The Holiday Gathering replaces Dinner with the Speaker this month. See page 4 for information.

PCAS MEETINGS CALENDAR

**HOLIDAY GATHERING**

December 11 - 6:30 pm
RSVP - see page 4

Lecture: 7:30 pm
(free and open to the public)

Speaker: Dr. Brian Fagan
Topic: *The Intimate Bond: How Animals Changed History*
Location: The Duck Club, Irvine
See map and directions on page 5

The Irvine Ranch Water District neither supports nor endorses the causes or activities of organizations that use the District’s meeting rooms which are made available for public use.

Peopling of the Americas: Current Perspectives
By Megan Galway

Dr. Moratto presented a historical overview of migration theories for the peopling of the Americas. He described the one theory that many of us accepted as fact not so long ago as the “Old Testament”: people crossed the Bering land bridge some 12,000 years ago, migrated through an ice-free corridor, and ultimately settled both North and South America. These people were credited with developing the fluted Clovis point. Clovis and Folsom points have been found in association with mammoth and bison kills. This was the view of the archaeological community in the 1960s and 1970s.

New research by Dr. Knut Fladmark suggested a period of marine migration. To those who say ocean travel was unlikely, Dr. Moratto points to the settlement of Australia more than 50,000 years ago by people who must have arrived by some kind of ocean-going craft. A number of sites in the Americas now indicate occupation much earlier than the Clovis period. Meadowcroft Rockshelter has been known as the oldest site in North America, and although there has been much debate, dating indicates it was occupied by at least 16,000 BP and possibly 10,000 years before that. Samples from deeper levels of Monte Verde I in Chile have returned possible dates of around 37,000 BP. Artifacts from Monte Verde II include mammoth bones and meat, mortars and pestles, and medicinal plants, indicating a multi-family habitation and negating the concept of small, transient, foraging groups. This level returned dates of 14,000 BP. The Manis Mastodon, excavated on the Olympia Peninsula in 1977, was found to have a bone projectile point embedded in a rib and dated to 13,800 BP. A number of other sites throughout North America have dated to periods from 26,000 to 14,000 BP during the last Glacial Maximum when there was no ice-free corridor. The much-debated Kennewick Man found in Kennewick, Washington, in 1996 has been dated to 9,000 years ago and seems to most closely resemble the Ainu—an ancestral Japanese maritime people.

Various sites now suggest that rather than the Americas being settled by an initial migration from the northwest through Alaska, people and technologies traveled from east to west and south to north. Western Stem points were found in older, deeper levels which had been overlaid in the west by the Clovis cultural levels. This phenomenon is seen in sites at Mesa, Alaska, and Paisley Caves. The Radio Point site on Santa Rosa, one of the northern Channel Islands of California, has been dated to 12,200–11,200 BP and contained Great Basin style artifacts, again suggesting an east to west migration.

Recently we have been introduced to the Solutrean hypothesis. Dennis Stanford and Bruce Bradley have suggested that Clovis technology, which bears a strong resemblance to the Solutrean tool kit seen in Europe, was brought to eastern North America by a maritime migration. The oldest known use of the atlatl and dart was by the Solutrean culture around 17,500 BP. In 1970 the scallop boat Cinbar dredged up a bipoint and mastodon skull off the coast of Virginia from a depth of 75 m. The skull was dated to 23,000 BP. Early dates for mid-Atlantic sites with this technology range from 23,500 to 14,000 BP, and Clovis sites are more numerous in the eastern United States, supporting the idea of a westerly migration.

Various later migrations have been proposed, some with solid evidence. The Na-Dene people appear in the record at 8,000–7000 BP and have a strong DNA tie to the Siberian people of that time. Suggestions that Olmec statues in Mexico have an African influence are currently unsupported. Norse (Viking) villages have been found in northern Newfoundland, and the Norse explored throughout the Gulf of St. Lawrence and Maine. Sweet potatoes, which originated in South America, are found in Polynesia, indicating travel, if not migration, between these two points. The people of Easter Island obtained 8 percent of their DNA from Native Americans prior to European contact. All these facts point to a number of migrations by different people over a period of up to some 26,000 years.
The later relationship between humans and animals is a complex historical tapestry. We explore the remarkable achievements of the donkey, the revolutionary impact of the horse, and discover how the saddle made the camel a useful beast of burden. We travel with Assyrian donkey caravans, accompany Mongol nomads, and go deep below ground in coal mines with Victorian pit ponies. The story ends with the story of our growing obsession with pets, which began with the Romans, flourished during King Charles II’s time, and became a popular obsession in the nineteenth century. You’ll never think of animals the same way again . . .

Dr. Brian Fagan was born in England and studied archaeology at Pembroke College, Cambridge. He was Keeper of Prehistory at the Livingstone Museum, Zambia, from 1959–1965. During six years in Zambia and one in East Africa, he was deeply involved in fieldwork on multidisciplinary African history and in monuments conservation. He came to the United States in 1966 and was Professor of Anthropology at the University of California, Santa Barbara, from 1967 to 2003, when he became Emeritus.

Since coming to Santa Barbara, Dr. Fagan has specialized in communicating archaeology and the past to general audiences through lecturing, writing, and other media. A former Guggenheim Fellow, he is regarded as one of the world’s leading archaeological and historical writers and is a much-in-demand popular lecturer about the past all over the world. His many books include three volumes for the National Geographic Society, including the bestselling Adventure of Archaeology. Other works include The Rape of the Nile, a classic history of archaeologists and tourists along the Nile, and four books on ancient climate change and human societies, Floods, Famines, and Emperors (on El Niños), The Little Ice Age, and The Long Summer, an account of warming and humanity since the Great Ice Age. The Great Warming: Climate Change and the Rise and Fall of Civilizations, a New York Times bestseller, describes the Medieval Warm Period of 1,000 years ago. His Before California (AltaMira Press, 2004) is a widely read summary of what we know about California before Europeans arrived. His other books include Chaco Canyon: Archaeologists Explore the Lives of an Ancient Society; Fish on Friday: Feasting, Fasting, and the Discovery of the New World; and Cro-Magnon: How the Ice Age gave birth to the First Modern Humans. Elixir: A History of Water and Humankind (2011) extends his climatic research to the most vital of all resources for humanity. Beyond the Blue Horizon, a book about ancient seafaring, was published in June 2012. The Attacking Ocean: The Past, Present, and Future of Rising Sea Levels appeared in June 2013. He is currently studying the human relationship with animals over the past 15,000 years.

Dr. Fagan has been sailing since he was eight years old and learned in the English Channel and North Sea. He has sailed thousands of miles in European waters, across the Atlantic, and in the Pacific. He is author of the Cruising Guide to Central and Southern California, which has been a widely used set of sailing directions since 1979. An ardent bicyclist, he lives in Santa Barbara with his wife, Lesley, and daughter, Ana.

2015 MEMBERSHIP AND SUBSCRIPTION RENEWALS

PCAS memberships and subscriptions expire at the end of the calendar year, and renewals for 2015 are due on January 1st.

Prompt renewal is particularly important this year. Due to outstanding efforts by our Publication Committee, the PCAS Quarterly will be current. In early January we expect to mail the final issues of Volume 50 (2014) and the first issue of Volume 51 (2015). To save on mailing costs, we plan to mail these together.

Only those members who have renewed for 2015 will be included in the first mailing. All others will receive their copies as they renew.

Because we now email the majority of newsletters, we are able to maintain our existing membership rates for 2015. Increases in postage and other costs have made it necessary to increase subscription-only rates. As recently noted in our newsletter, the PCAS Quarterly annual subscription is now $40, and the newsletter is $20. Renewal forms may be found in this newsletter or at www.pcas.org. We look forward to receiving your renewals for 2015.
PCAS HOLIDAY GATHERING

Thursday, December 11, 2014
6:30 PM
IRWD Duck Club

5th Annual Potluck

Dr. Brian Fagan will speak on

The Intimate Bond: How Animals Changed History

Lecture at 7:30 pm – free and open to the public

1. This year’s celebration will be at the Duck Club in Irvine.
2. Bring finger food (appetizer or dessert) to serve 6 people.
3. Bring food that doesn’t require heating.
4. No alcoholic beverages are allowed.

Sign up by contacting Megan Galway, President@PCAS.org or 714-539-6354, and let us know what you are bringing.

The Irvine Ranch Water District neither supports nor endorses the causes or activities of organizations that use the District’s meeting rooms which are made available for public use.
DIRECTIONS TO THE DUCK CLUB

Directions from I-405

1. Exit the 405 Freeway on Culver Avenue and go south.
2. Turn right on University Drive.
3. Turn right on Campus Drive.
4. Stay in the right lane and immediately turn right onto Riparian View which is marked by a dark green sign identifying it as the entrance to the San Joaquin Wildlife Sanctuary.
5. Proceed to Duck Club entrance on left. Signs will direct you.

If lost, call 714-290-1845.

Note: The entrance from Campus Drive is right turn only.
DIG THIS...

Lectures

Archaeology, History, and the Lone Woman of San Nicolas Island, by Dr. René Vellanoweth (CSULA), presented by the Cooper Center. Fullerton Arboretum, 1900 Associated Road, Fullerton, December 10, 7 pm. Free. Information: www.jdcoopercenter.org/lecture.

Classes, Meetings, and Events

Visit www.pcas.org for all the latest news.

Editor’s Note: Please confirm time and place of listing prior to the event. Submit items for Dig This to newsletter@pcas.org.

NOVEMBER BOARD MEETING

SUMMARY

Submitted by Brian Steffensen

President Megan Galway called the meeting to order at 7 pm at the Old Courthouse in Santa Ana. PCAS Board Members present: Rene Brace, Gail Cochlin, Scott Findlay, Sherri Gust, Steve O’Neil, and Brian Steffensen. Members present: Bob Brace and Hank Koerper.

The September and October minutes were approved with corrections. The treasurer’s report was approved with all expenditures.

Old Business

The Election Committee reported that Stephen Dwyer, Hank Koerper, and Kathleen Shada had been unanimously elected by voice vote at the November meeting. Outgoing Board members, Linda Christison, Gail Cochlin, and Sherri Gust were thanked for their service. The PCAS Quarterly sales and information table at the San Diego Rock Art Symposium received new memberships and sold Quarterly issues.

The Board discussed preparations for the December Holiday Dinner meeting at the Duck Club. There will be a small auction or donation-award activity to raise scholarship funds. Some of Dr. Fagan’s signed books will be used for fundraising. Joe Hodulik and Sherri Gust will be donating platters of catered sandwiches.

New Business

Scott Findlay will purchase a new bookcase for the library. A new outside door to the PCAS library has been installed. The previous door had been damaged in an attempted break-in.

Joe Hodulik’s Donation-Award table earned $164 at the November meeting for the PCAS Scholarship fund! Brian Steffensen reported that speakers have been scheduled through September 2015. A new life membership has been received. Scott Findlay reported that there are no field trips planned over the holidays. There will be no curation workday in December. Hank Koerper reported that the Publications Committee is continuing work on issues in memory of Jay von Werlhof.

The meeting was adjourned at 8:00 pm.
PCAS CODE OF ETHICS

The Pacific Coast Archaeological Society (PCAS) is a nonprofit group of professional and avocational people dedicated to proper management of our cultural resources, public education, and the protection and preservation of archaeological materials and collections.

The following principles have been adopted by the PCAS:

1. Professional methods and forms will be used on all archaeological field surveys, excavations, and laboratory sessions.
2. A complete record of field and laboratory work will be filed with the PCAS Curator and stored at a facility approved by the Society’s Board of Directors.
3. No archaeological materials will be removed without proper permits, landowner permission, and a field research design.
4. Unless otherwise legally stipulated before activity commences, all materials collected will be deposited for further research with the Curator at a facility approved by the Society's Board of Directors.
5. All generated reports will be the property of the Society and distributed as deemed appropriate.
6. All Society field activities will be performed only under the direction of a qualified field archaeologist (Principal Investigator) and the supervision of field or site directors.
7. The above principles will be observed on both Society approved projects and projects performed under the direction of an authorized institution or organization.
8. The Society and its members will strive to educate the public of the importance and proper management of our non-renewable cultural resources and to discourage the collection and commercial exploitation of archaeological materials.
9. PCAS members shall not benefit from the acquisition, purchase, sale, or trade of archaeological artifacts, materials, or specimens.
10. All members shall adhere to City, County, State, and Federal antiquities laws.

Rock Art 2014

The 39th Annual San Diego Rock Art Symposium was held at the Mingei International Museum, Balboa Park, November 1. PCAS thanks the San Diego Rock Art Association, the new symposium sponsor, for allowing us to have a Quarterly sales and information table. The symposium was a great success, and we look forward to Rock Art 2015.
