Pacific Coast Archaeological Society Quarterly

The Pacific Coast Archaeological Society Quarterly is a publication of the Pacific Coast Archaeological Society (PCAS), which was organized in 1961. PCAS is an avocational group originally founded to study and to preserve the anthropological and archaeological history of the original inhabitants of Orange County, California, and adjacent areas. The Publications Committee invites the submittal of original contributions dealing with regional history and prehistory. Although PCAS is especially interested in reports which shed further light on the early inhabitants of coastal southern California, it is always interested in reports on the wider Pacific Coast region.

Information about subscriptions to the Pacific Coast Archaeological Society Quarterly and the PCAS Newsletter is available online at www.pcas.org. Back issues of the Pacific Coast Archaeological Society Quarterly are available. An index to Volumes 1 through 40 is available as Volume 40, Numbers 3 & 4. This searchable index is online at www.pcas.org. Three Occasional Papers, on Catalina Island, Mexican Majolica, and the Peralta Adobe, have also been published by PCAS. To place an order, receive information about the Pacific Coast Archaeological Society, or submit an article for publication, email publications@pcas.org or write: Pacific Coast Archaeological Society, P.O. Box 10926, Costa Mesa, California, 92627. Additional information is available at www.pcas.org. PCAS is not responsible for delivery of publications to subscribers who have not furnished a timely change of address.

Recent issues of the Pacific Coast Archaeological Society Quarterly are available at www.pcas.org and can be downloaded and viewed, but not printed. Articles appearing in the Pacific Coast Archaeological Society Quarterly are abstracted in Historical Abstracts and America: History and Life. This issue of the Pacific Coast Archaeological Society Quarterly is copyrighted © 2010 by the Pacific Coast Archaeological Society. ISSN 0552-7252.

PCAS Officers 2008

President Scott Findlay
Vice President Sherri Gust
Secretary Rene Brace
Treasurer Tony Sawyer

Please note that this issue was published in August 2010. In the PCAS Quarterly publication sequence, this issue is Volume 44, Number 1 (subscription year 2008).
Contents

More on Lozenge Stones: A Record from the Cogged Stone Site ......................................................... 1
Henry C. Koerper and Nancy Anastasia Desautels-Wiley

The Archaeology of Witchstick Cave, Tomo Kahni State Historic Park, California ......................... 25
Matthew R. Des Lauriers and Mark Q. Sutton

More on Small Phallic Talismans from the Cogged Stone Site ......................................................... 33
Henry C. Koerper and Nancy Anastasia Desautels-Wiley

The Archaeology of the Lazy T Cemetery Site (CA-LAN-767),
Southwestern Mojave Desert, California ......................................................................................... 43
Mark Q. Sutton, R. W. Robinson, Jill K. Gardner, and Robert D. Rego

Additional Grooved Stone Artifacts from CA-LAN-62 ................................................................. 83
Henry C. Koerper, Patrick B. Stanton, Polly A. Peterson,
Benjamin R. Vargas, and Donn R. Grenda

Cover: Southern Lozenge stones from the Cogged Stone site (CA-ORA-83). Drawings by
Joe Cramer.
About the Authors

Matthew R. Des Lauriers, Ph.D., received his BA at California State University, Bakersfield, and his MA and Ph.D. at UC Riverside. His special interests include maritime hunter-gathers, lithic technology, and the peopling of the New World. He is presently an associate professor of anthropology at California State University, Northridge. He and his wife, Claudia, have just welcomed their first child, Emile, into the family.

Nancy Anastasia Desautels-Wiley, Ph.D., began her career studying classical languages. She subsequently broadened her scholarly pursuits to include research focused on both prehistoric and historic archaeology, and she was certified in both subdisciplines by the Society of Professional Archaeologists. Experience in New York State prehistory and a strong classical background in history and architecture have served her well as research director and principal investigator for the oldest cultural resource management firm, Scientific Resource Surveys, Inc. (SRS) (est. 1973). Dr. Desautels-Wiley has managed the longest privately funded cultural resource investigations in southern California (29 years). These investigations comprise a multi-site and multi-disciplinary project that integrates archaeological, historic, ethnographic and paleontological studies. Within the last three years, she has expanded her expertise in Native American cultural studies and has recently accepted a position as tribal archaeologist for the Chilkat Tlingit Tribal group in Haines, Alaska. She is married to a Tlingit/Southern Tutchone Native, Ted Wiley, and they have opened a branch office of SRS in Haines in order to train Native American monitors. The company is researching the Tlingit language using the Alaskan field notes of J. P. Harrington; the goal is to generate a comparative Tlingit dictionary.

Jill K. Gardner, Ph.D., received her doctorate in anthropology from the University of Nevada, Las Vegas. She is currently the owner and president of Jill K. Gardner & Associates, Archaeological Consultants, based in downtown San Diego. Dr. Gardner’s main research areas are the Mojave Desert, the Great Basin, the southern Sierra Nevada, the San Joaquin Valley, the southern California coast, and inland southern California. She has also conducted excavations and analyses of Late Roman/Coptic mummies in Egypt and participated in excavations at a Neolithic site in southern Jordan. Dr. Gardner has published articles in the Journal of California and Great Basin Anthropology, Quaternary Science Reviews, British Archaeological Reports, Pacific Coast Archaeological Society Quarterly, Coyote Press Archives of Great Basin Prehistory, Proceedings of the Society for California Archaeology, and Nevada State Museum Anthropological Papers, and she has co-authored books through the University of Arizona Press and AltaMira Press.

Donn R. Grenda, Ph.D., received a BA in anthropology and economics from the University of Redlands in 1988, an MA in anthropology from the College of William and Mary in 1992, and a Ph.D. in anthropology from the University of Arizona in 1997. Dr. Grenda has performed research and archaeological and historical studies throughout Arizona and California since 1985 and is currently the president of Statistical Research, Inc. His research interests include coastal hunter-gatherer adaptations, economic anthropology, and archaeological method and theory. In 2005 he was appointed by Governor Schwarzenegger to the State Historical Resources Commission.
Henry Koerper, Ph.D., received a BA (1965) and an MA (1968) from UC Davis, and he earned a Ph.D. in anthropology at UC Riverside in 1981. His varied employments have included: CDF firefighter; USFS fire suppression field and laboratory researcher; California Army National Guard explosives technician; archaeological field excavator (e.g., Old Sacramento Project, Prescott College Black Mesa Project); Peace Corps teacher and athletic coach (Voi Harambee High School, Kenya); college anthropology professor (Chapman College [5 years] and Cypress Community College [30 years]); and archaeological consultant to several southern California CRM firms. Semi-retirement allows Dr. Koerper time to help produce the PCAS Quarterly.

Polly A. Peterson, Ph.D., is a graduate and research fellow of the Boston University Department of Archaeology and is presently an adjunct faculty member at Waubonsee Community College. Formerly a senior lithic analyst at Statistical Research, Inc. in Redlands, she has analyzed lithic assemblages from California, Arizona, New York, Belize, and Mexico.

Robert D. Rego began his anthropology studies at Antelope Valley College. He transferred to UCLA where he joined the Reserve Officers Training Program and received his BA in anthropology in 1985. He then moved to active service with the US Air Force, where he has served ever since. Today, he is a brigadier general with the Air Force Global Strike Command. He worked on the Lazy T collection during his time at UCLA.

R. W. Robinson, MA, developed his initial interest in archaeology in 1960 working with the California State Department of Parks and Recreation. Between 1960 and 1967 he worked part time and seasonally for Parks and Recreation on several major highway and water system projects while attending college. Robinson received his MA degree in 1967 from California State University, Sacramento, and that same year he began teaching anthropology at Antelope Valley College in Lancaster, California. Professor Robinson developed the anthropology and archaeology program at this institution in the years that followed and retired from Antelope Valley College in 2007 with 40 years service. Robinson's field experience includes most of California as well as parts of Nevada and Mexico. Since 1984, Robinson has served as co-director with Alina Aparicio de la Riva on several research projects on the south coast of Peru through the California Institute for Peruvian Studies and Universidad Catolica de Santa Maria in Arequipa, Peru.

Patrick B. Stanton, MA, was educated at the University of Tennessee–Knoxville and Wichita State University. Stanton is an expert in the field of human osteology with special interests in paleopathology, bioarchaeology, taphonomy, and field and laboratory applications of noncontact 3 D digital scanning. He is currently attached to field projects in northeast Iowa.
Mark Q. Sutton, Ph.D., began his career in anthropology in 1968. While still in high school, he took advantage of the opportunity to participate in archaeological excavations conducted by the local community college. He went on to earn a BA (1972), an MA (1977), and a Ph.D. (1987) in anthropology. He has worked as an archaeologist for the US Air Force, the US Bureau of Land Management, and various private consulting firms, and he has taught at a number of community colleges and universities. He taught at California State University, Bakersfield, from 1987 to 2007, where he retired as emeritus professor of anthropology. He now works for Statistical Research, Inc. in San Diego. From 1986 to 2000, Dr. Sutton served as the editor of the Journal of California and Great Basin Anthropology. Dr. Sutton has investigated hunter-gatherer adaptations to arid environments, entomophagy, prehistoric diet and technology, optimal foraging theory, and regional culture histories. Dr. Sutton has worked at more than 120 sites in western North America, has presented more than 120 papers at professional meetings, and has authored more than 170 books, monographs, and papers on archaeology and anthropology, including several articles in recent issues of the Pacific Coast Archaeological Society Quarterly.

Benjamin R. Vargas, MA, was educated at California State University, Fullerton, and California State University, Long Beach. He has been involved in archaeological investigations and research throughout California and Arizona since 1987. Formerly, he worked at Statistical Research, Inc., as a principal investigator. He presently works at AECOM as a principal investigator. His research interests include contact period Native American-Hispanic interactions, coastal hunter-gatherer adaptations, and archaeological method and theory.
